#### FINANCE AND TRADE.

MONEY MATTERS continue dull in the extreme, and the banks are overflowing with capital that nobody wants. Exchange is becoming almost scarce, cotton sales are becoming small, and as most of what has been sold lately is of low grade the amount of money moving is slight. The demand is small also, but the receipt does little more than cover it. ing on New York, seiling at 's premium; on New Orleans 1 discount, selling at were quiet, as usual, the latter without change and quotations. The New York iness in confidence and wonderings who bac as were then worth \$88.69 as against \$1,00 in silver coin (which contains ds5.8 10 grains to the dollar), \$84 73. The proposed new sliver dollar (to con-412.5 10 grains), \$90.66. The New York Tribune reports that the banks in New York are etrengthening their position very decidedly this week, the proportion of legal-tenders to deposits were 20.3 per cent, against 18 S in the report of the weeksbefore. This is the more gratify-ing b-cause the treasury statement of Saturday showed that the withdrawel of bonds held for circulation had continued large during the week. It is not surprising that the volume of currency shrinks, for a comparison of clear. ngs with those of former years shows that the amount of money required for the greatly reduced transactions of this year is comparatively small. Since January 1st, a period of fifteen weeks, the aggregate clearings of the associated banks in this city have been about \$5,568 0.0,000; last year during the same eriod they were about \$7,579,000,000, a decline of over thirteen per cent." The New York Tribune recently asserted that the banks having surrendered \$90,-000 circulation, that amount liberated \$116,030 to \$122 000 in currency by the return of bonds, and they have, there-fore, more money to loan than they had before To this the Post objects that "if the banks hold \$350,000,-\$90 000 are returned to withdraw \$100,-900 United States bonds, the national bank notes in exister ce are evially reduced to \$349,910,000. If one bank then obtains \$116,500 or \$122,000 in currency for the Up'ated States bonds, some other bank must lose this amount of currency." Tr.e Chicago Tribune of Tuesday states; "The failure of the City national bank in no way affects the City savings bar 2, which has no connection of any R and with the broken instituof any hind with the broken institu-tion." The same paper says: "The deman, for silver is large, and it is possiol" that it may soon be at a premium. the following, from the New York Journal of Commerce, contains in the last sentence information that may be of value to parties intending to use the asfe-chronometer: "A time-lock is connected with clockwork piaced on the inside of the room or vault to be secured, and set a given hour. When the door is once closed, the owner himself cannot an it putil the hour set has arrived The clock work reaching the hour moves a lever wolch allows the door to be unlocked. It will cost less to buy a timelook complete than to attach the clockation lock. Buying, Belling, 603-633-86387 906-

THE COTTON MARKET yesterday exibited no change in tone from that of the day be ore. The principal markets were unchanged except that in Liver-pool, 1 32d were gained on deliveries, only to be lost again, however, in the ening. Fu ures were lower in New York. In our market there was some looking round, but the offerings were of at all satisfactory to buyers, some of whom described them as "odds and For good lists prices were generally held above buyers' views; they had mustly been bought on speculation and were held for a profit. For low grades there was irregularity, some holders making concessions to effect sales. Quotations were retained, but there we no spring in feeling, an apathetic disposition was general. For anything like ce lists holders think they shall get better prices, as the preser rates are conceded to be low. The New York Bulletin, of Tuesday, reported: "The market still appears to be laboring under a sort of dry re', and on both spots and futures prices were again lower, with the too, flat during the greater portion of 'ce day. Exporters have shown no interest whatever in sample lo's, to advice from abroad proving disaging for any movement to ship, a'\_d little or nothing was required for speculative use. Liverpool has become easier and without encouraging features, the Mississippi still persistently refuses to overflow to a damaging extent, and, with receipts prety full, the main sources upon which the market depends for its influences at the moment were discouraging " Quotations at the Memphis cotton exchange were as follows: Yesterday.
